### 4.0. Time-Bound Plan

#### 4.1. Year of first RSPO P&C certification (planned or achieved)

2011 ▼

#### 4.2. Year expected to achieve 100% RSPO certification of estates and mills.

2014 ▼

##### 4.2.1. If target has not been met, please explain why.

In 2014 Agropalma Group has achieved RSPO certification to all its FFB suppliers. However, after run a LUC analysis (in 2015), Agropalma found that two of its 237 schemed suppliers had liabilities, according the rules of RSPO Remediation and Compensation Procedures. So, these two farmers were removed from RSPO Certificaion. At moment, company is running a Remediation and Compensation process within RSPO. When it is finished, company intends to include this farmers in the certified supply base again. Other important issue is the fact that few new FFB farmers are becoming part of Agropalma supply base. They start as independent suppliers and if they perform well in terms of production, labor and environmental management, they will be able to be integrated as schemed suppliers. Every time this happens, these farmers will require a certain time to prepare themselves and obtain RSPO certification. Therefore, it is not possible to establish a fix deadline, because the process is dynamic. 2014 was registered just because the ACOP system requires.

#### 4.3. Year expected to achieve 100% RSPO certification of Scheme/Plasma/Associated smallholders and Outgrowers.

2014 ▼

##### 4.3.1. If target has not been met, please explain why.

### Others

The main obstacles are placed in demand side of the supply chain. As most of Agropalma clients are placed in Brazil, where the demand for Sustainable Palm Products is still low (but increasing). International clients (especially Europeans) are more interested and already buy significant amounts of certified products from Agropalma. A special challenge refers to multinational companies that delay to apply their global sourcing policies related do RSPO in Brazil. To increase demand in internal market Agropalma always promote RSPO and explain the issues and concerns related with sustainability of palm oil production worldwide to consumer companies in Brazil.

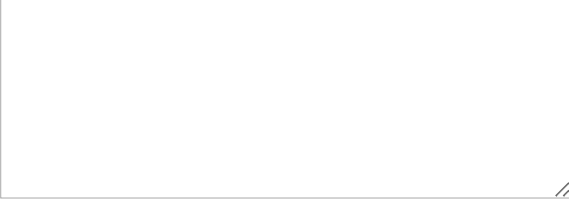

10.2. In addition to the actions already reported in this ACOP how has your organisation supported the vision of RSPO to transform markets in other ways?

- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Promotion of CSPO outside of RSPO venues, eg. trade workshops, industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
